

REPORT OF SITE VISIT

Class- Second year diploma

Date: 19/02/2016

Division- B

Number of student's present-28

Places visited- HUNNARSALA BHUJ & G.E.C BHUJ

Number of sites visited- 2

Undertaking by the students- attached

Faculty members accompanying students- Mr. Abdulrauf Khatri and Mr. Vishal Thacker

Facility provided by institute- Bus facility

Tiffin facility- Students had taken their tiffin

Route of sites visited- 1) AVIETR to Hunnarshala Bhuj (Approx.50km)

2) Hunnarshala Bhuj to G.E.C Bhuj (Approx.6km)

3) G.E.C BHUJ to AVIETR (Approx.55km)

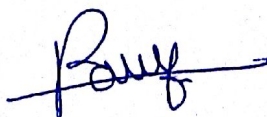

Description of works/items observed/learnt at site 1(Hunnarshala): It was started in 2001 with a team. We saw the types of soil, soil structure, soil blocks which were made by students of hunnarshala. We also saw the structure of wood which was designed by manually. We also made one block of soil with teacher at that site. Hunnarshala is one type of research center of soil. There was 150 type of soil. They use more soil and less cement ratio in construction work. Hunnarshala is one type of thinking school, which we think in mind we have to make it practical.

Description of works/items observed/learnt at site 2(G.E.C Bhuj): We saw the making of chemical department, and it was very heavy structure. There was one combined footing used in columns and iron materials which was used in construction was very heavy. There was one section of stairs in curve position. In that structure steel was used of 8,10,16,25 & 32 mm. There were over 30 workers who were working at that site.

Photographs were taken.
