

Industry Institute Interaction (III) Activities

Industry Institution Interaction (III) is established to provide close links with industries. The purpose of the cell is to find out the gap between need of the industry and end product of the institute. The cell is the bridge between the industry, the real world and the institute. One of the objectives is also to offer programmes fulfilling the needs of continuing education of the industrial personnel.

We believe in developing programmes, which provides solutions to real world problems with a strong desire of forging innovative alliance with industry to achieve synergy. III Cell imparts benefits to all components like students, faculty, institute and industry by interacting closely with the industries. Students are exposed to the real world and learn the needs of their future career. Industry exposure of faculty is very much helpful to guide students about latest industrial practices..

Industries are able to know recent developments and inventions in their fields and implement projects for technologically driven economy. The III Cell is governed by the Advisory Committee; headed by the Director as a Chairman, Head of the Department as members and Placement-cum-Training Officer as a Member Secretary.
